

Test Center

Flexibly configurable and immediately ready for use

ela[container]

Description

Do you need additional space to test patients for coronavirus? On request, ELA Container will provide you with mobile container facilities, e.g. to test the population for infection with the virus. We have already set up a number of "corona test centres" in our home region, and offer our containers to all authorities and health facilities. They can be set up quickly, flexibly and at any location.

Based on our previous experience in the delivery of corona test centres, we propose a container system consisting of two ELA premium containers. On a total of 36m², you will receive all the functional conditions you need: From various functional rooms, to hygiene facilities such as WC and washbasins, to complete air conditioning.

The floor plan of the container facility is functionally and practically well thought out. Thus, a total of three rooms find their place in the facility. The examination room can be entered and left through specially installed doors. A study for the specialist staff adjoins the examination room and is separated from it by a door. Before the patients are tested, they must register at an external switch. All rooms can be entered independently.

Please contact us for further information. We will be happy to advise you and submit an individual offer.

Advantages

- + Separate staff entrance
- + Light through motion detectors
- + Personnel airlock
- + Ready to use & fast delivery
- + Can be placed anywhere

20 feet ELA Premiumcontainer

Article: CF20H30-B00000
 Dimensions: 6.055 mm × 3.000 mm × 2.890 mm
 Ceiling height: 2.500 mm

Equipment

- + 1 MZ external door 875 x 2000 mm, with profile cylinder lock
- + 1 canopy
- + 1 tilt and turn window 2500 x 1200 mm, insulating glass with roller shutter
- + Electrical installation 400/230 V with electrical input and output CEE 32 A
- + 2 LED panels
- + various shockproof sockets
- + 1 electric convector with thermostat, 2 KW
- + Roof, wall and floor areas in insulated design
- + PVC floor covering

20 feet ELA Premiumcontainer with 1 WC

Article: CF20H30-B1WC00
 Dimensions: 6.055 mm × 3.000 mm × 2.890 mm
 Ceiling height: 2.500 mm

Equipment

- + 2 MZ external doors 875 x 2000 mm, with profile cylinder lock
- + 1 canopy
- + porch with access to initial reception and doctor area
- + 1 sliding window 2500 x 1200 mm, insulating glass with roller shutter
- + 1 sliding window 1500 x 1200 mm, insulating glass
- + Intercom system
- + Electrical installation according to VDE 0100 400/ 230V with electrical input and output CEE 32 A
- + 2 LED panels
